University of Sheffield, Dept. Computer Science
- 1995 – 1996 MSc – Artificial Intelligence
University of Edinburgh, Dept. Artificial Intelligence
- 1991 – 1994 BSc – Neuroscience
University of Sheffield, Dept. of Biomedical Science

KEY PROFESSIONAL ACHIEVEMENTS

2009 – Present Senior member of the world's first fully accredited product carbon footprint certification and labelling team.

2008 Won a scholarship to study the Strategic Carbon Management MBA at UEA.

2006 – 2007 Project managed test-tool development projects, including involvement in contract negotiations, for a large German-based customer who designs for European and North American markets. Project delivered on time and to budget, resulting in Pi securing a follow-up project from the same customer. Project size ranged from £50k to £600k.

2006 Designed and implemented a full-life cycle quality system (auditable under ISO 9001:2000) for a US-based customer which is currently in use by a team of 10 engineers spread over 3 continents.

2000 – 2007 Core part of a team (that I managed from 2006) and who successfully won repeat business from a key customer through 4 contract review phases.

2001 Six month secondment to main customer base in USA, successfully troubleshooting to identify and resolve technical and performance management issues; transforming customer testing department.
